This code is written to file srcedo/linearized.steadystate.m.

A.5 readme.txt

 $\langle srcedo/readme.txt \ 38 \rangle \equiv$

How to run the model:

In Matlab/Octave:

- 1) Download Dynare Version 4 from the Dynare website: http://www.dynare.org/
- 2) Download the EDO files in a folder you choose.
- 3) Start Matlab/Octave and change the current directory to the folder in step 2.
- 4) Link in Matlab/Octave the Dynare folder in the menu under file/Set Path (or use the "addpath path/to/dynare").
- 5) Run the command "dynare linearized" or "dynare Dynare_edo" from the Matlab/Octave

Content of the EDO folder:

Dynare_edo.mod: Dynare model file containing the latest estimated parameters and non-Dynare_edo_steadystate.mod: Dynare steady-state file computes the steady state of the linearized.mod: Dynare model file containing the latest estimated parameters and nonlinearized_steadystate.mod: Dynare steady-state file computes the steady state of the

This code is written to file srcedo/readme.txt.
